

# Manufacturers' Shipments, Inventories and Orders

May 1969

FOR RELEASE: July 1, 1969

SERIES: M3-1(69)-5

## NEW ORDERS

New orders in May at \$54.1 billion for all manufactured products recorded a decrease of \$500 million from the April total of \$54.6 billion, after seasonal adjustment, the Bureau of the Census, U.S. Department of Commerce, announced today.

In the durable goods sector, new orders in May declined \$1 billion to a total of \$29.9 billion following their sizeable increase in April. However, this decline was partially offset by an increase of \$500 million in new orders for nondurable goods which reached \$24.2 billion. Most of the decline in durable goods orders occurred in electrical machinery and transportation, whereas most of the increase in nondurable orders was centered in the food and chemical industries. Among the supplemental series, machinery and equipment orders declined \$800 million to a May total of \$6.3 billion, returning to a level close to the March figure. Orders for defense products at \$1.8 billion compared to \$2.1 billion for April registered their third consecutive monthly decrease, while orders for consumer durables also declined to \$2.1 billion for May from \$2.2 billion in April. (SEE CHART 1)

## SHIPMENTS

Manufacturers' shipments in May increased to \$53.9 billion compared with \$53.3 billion in April. The nondurable goods sector which rose \$600 million to a May total of \$24.3 billion accounted for all the increase, whereas durable goods shipments at \$29.6 billion remained virtually unchanged from April. While increases in shipments occurred throughout the nondurables sector, the more significant increases were recorded in foods, and chemicals. (SEE CHART 2)

## UNFILLED ORDERS

Unfilled orders held by durable goods manufacturers increased \$300 million to \$86.8 million at the end of May as new orders exceeded shipments during the month. The pattern by industry was mixed, with increases in the nonelectrical machinery and metals industry groups partially offset by decreases in transportation and other industries. The unfilled orders-shipments ratio for durable goods was virtually unchanged at 3.25 months for May compared with 3.24 months for April. (SEE CHART 3)

## INVENTORIES

Total inventories held by all manufacturers at the end of May increased \$1 billion to \$92.0 billion, continuing the rise of recent months. The inventory-shipments ratio remained virtually unchanged at 1.71 since the increase in inventories exceeded the increase in shipments. The inventories of durable goods manufacturers increased more than \$700 million to \$60.2 billion and non-durable goods manufacturers increased their stocks by \$200 million to \$31.8 billion at the end of May. The increases were wide spread among most industry groups. At the total level increases were also reported at all stages of fabrication. (SEE CHART 4)

The figures on the durable goods industries in this report supersede those issued earlier in the advance report on durable goods. The advance report is based on a tabulation of early reports and is limited to statistics on shipments, new orders, and unfilled orders for a few broad industry categories. The present report is based on more complete reporting, but the estimates are also considered preliminary. Final figures will appear as historical data in the report to be published for next month.

Inquiries concerning these figures should be addressed to the U.S. Department of Commerce, Bureau of the Census, Industry Division, Washington, D.C. 20233.

<sup>1</sup>During 1968 manufacturers in ordnance, communications, aircraft and aircraft parts, and shipbuilding industries began to provide aggregate figures on shipments, orders, and total inventories of work performed for Department of Defense. The results of these reports are included in these new defense series. Since there is no historic data available to develop separate seasonal factors for these reporters, the data has been seasonally adjusted using the factors of these industries. <sup>2</sup>Preliminary. <sup>3</sup>Revised. <sup>4</sup>Shipments and new orders adjusted for trading-day and calendar month variation; unfilled orders and inventories as of end of month. <sup>5</sup>The supplementary series are regroupings of the separate industry categories as follows:

- Consumer durable goods industries - Household furniture; kitchen articles and pottery; cutlery, handtools, and hardware; household appliances; ophthalmic goods, watches, and clocks; and miscellaneous personal goods.
- Machinery and equipment industries - Machinery, except electrical (excluding farm machinery and equipment and machine shops), electrical machinery (excluding household appliances, communication equipment and electronic components), shipbuilding and repairing, and railroad and street car equipment.
- Defense products industries (old series) - Based on reports for companies classified in the communication equipment, complete aircraft, aircraft parts, and ordnance industries. (Thus, this series includes significant amounts of nondefense work in these industries and omits defense work performed in the shipbuilding industry.)
- Defense products (new series) - Based on separate reports on defense work filed by large defense contractors in the following industries: ordnance, communications, complete aircraft, aircraft parts, and shipbuilding. Thus, it differs from the old series in that it includes defense activity in shipbuilding and excludes non-defense work in ordnance, communications, complete aircraft, and aircraft parts. The data are comparable to those published annually in the MA-175, Shipments of Defense-Oriented Industries, for the specified industries.
